

CASE STUDY 1: AMAZON

Industry: E-Commerce

Amazon extensively uses Business Intelligence (BI) to understand customer behavior, optimize pricing, manage inventory, and improve product recommendations. The company collects large volumes of customer transaction and browsing data to identify purchasing trends and predict future demand.

KPIs Tracked:

- Customer Conversion Rate
- Average Order Value
- Inventory Turnover
- Product Ratings
- Customer Retention Rate

Decision Informed:

Using BI dashboards and predictive analytics, Amazon determines which products should be promoted, restocked, discounted, or recommended to customers. These insights help improve customer satisfaction and maximize revenue.

CASE STUDY 2: AIRBNB

Industry: Hospitality & Tourism

Airbnb leverages Business Intelligence to analyze guest behavior, booking patterns, host performance, and market demand. By studying historical booking data and customer preferences, Airbnb helps hosts optimize pricing and improve occupancy rates.

KPIs Tracked:

- Occupancy Rate
- Booking Conversion Rate
- Average Daily Rate (ADR)
- Customer Ratings
- Revenue per Available Listing

Decision Informed:

The insights generated through BI allow Airbnb and hosts to make informed decisions regarding pricing, property improvements, seasonal promotions, and customer experience enhancements.

CASE STUDY 3: ETSY

Industry: Handloom, Handicrafts & Online Marketplace

Etsy is an online marketplace that supports artisans, craft makers, and small creative businesses. The company uses Business Intelligence to understand buyer preferences, identify trending products, and improve search visibility for sellers.

KPIs Tracked:

- Product Views
- Conversion Rate
- Seller Revenue
- Customer Ratings
- Trending Search Keywords

Decision Informed:

BI insights help Etsy recommend products to customers, identify emerging craft trends, and assist sellers in optimizing product listings. These decisions improve marketplace performance and increase sales opportunities for small businesses.
